Final Cut Pro for iPad 2.1: Getting Started

1. Getting Started with Final Cut Pro for iPad

- The Project Screen
- Downloading the Demo Project
- The Edit Screen
- Playing the Demo Project

2. Creating Projects and Importing Media

- Creating a Project
- Importing Media

3. Recording with the Pro Camera

- Choose a Recording Format
- Set Focus & Exposure
- Adjust Exposure Compensation
- Adjust White Balance
- Access Camera Settings
- Change the Focal Length
- Record Movies

4. Organizing Media

- Hiding the Timeline
- Filtering Media Types
- Changing Clip Appearance
- Previewing Clips
- Trimming Browser Clips
- Favoriting Clip Ranges
- Adding Keywords to Clip Ranges
- Rejecting Clip Ranges
- Keywording Multiple Clips

5. Navigating the Magnetic Timeline

- Adding Browser Clips to the Timeline
- Appending Clips
- Inserting Clips
- Connecting Clips

6. Connected Storylines

- Creating a Connected Storyline
- Editing Connected Storylines
- Adding Clips to a Connected Storyline
- Breaking Apart a Connected Storyline

7. Working with Selection Modes

- Using Clip Selection Mode
- Using Picture in Picture
- Using Range Selection Mode
- Using Edge Selection Mode

8. Editing with the Jog Wheel

- Showing, Expanding, and Moving the Jog Wheel
- Trimming Browser Clips with the Jog Wheel
- Trimming Timeline Clips with the Jog Wheel
- Repositioning Timeline Clips with the Jog Wheel

9. Working with Timeline Controls

- Showing Timeline Controls
- Working with Snapping
- Working with Position
- Replacing Video Clips with Gap Clips
- Trimming Clips and Maintaining Project Duration
- Replacing a Gap Clip
- Adding Time to a Project
- Manipulating Gap Clips

10. Working with Audio

- Adding a Music Clip to a Project
- Connecting a Sound Effect Clip
- Turning On Audio View
- Adjusting Clip Volume
- Ducking a Clip Volume Range
- Reducing Background Noise
- Assigning Audio Roles

11. Voiceover Tool

- Enabling
- Changing Voiceover Settings

* Recording

12. Using Soundtracks

* Previewing Soundtracks
* Trimming Soundtracks

13. Adjusting Color

* Applying the Color Adjustments Effect
* Making Color Adjustments
* Disabling Color Adjustments
* Applying and Adjusting Color Effects
* Combining Effects
* Using Color Grading Effects

14. Working with Effects

* Locating Blur, Distort, and Stylize Effects In the Inspector
* Using the Focus Blur Effect
* Applying Blur, Distort, and Stylize Effects from the Content Browser

15. Removing Video Backgrounds

* Adding and Customizing a Title
* Duplicating a Clip for the Foreground Element
* Guidelines for the Scene Removal Mask
* Applying the Scene Removal Mask
* Modifying the Scene Removal Mask
* Replacing a Background

16. Changing Clip Speed

* Reducing Clip Playback Speed
* Creating a Slow-Fast Speed Effect
* Reversing Clip Playback Speed
* Creating a Freeze Frame

17. Transforming Video

* Options for Transforming Clip Scale and Position
* Working with Ken Burns
* Creating a Split-Screen Effect
* Combining Effects and Transforms
* Adding and Modifying a Gradient Background

18. Reframing Video

- Using Auto-Crop
- Modifying Auto-Crop
- Animating Framing with Keyframes

19. Working with Transitions & Titles

- Adding, Trimming, and Modifying Transitions
- Adding and Modifying Titles
- Changing the Title Animation

20. Adding Live Drawing

- Working With the Live Drawing Tools
- Trimming a Live Drawing Clip
- Trimming a Live Drawing Clip
- Modify Live Drawing Parameters
- Underlining a Title With Live Drawing

21. Sharing Projects

- Sharing Media Options and Presets
- Modifying Sharing Presets
- Choosing Sharing Destinations
- Advanced Topics

22. Multicam Editing

- Downloading the Project Media
- Sorting and Previewing the Media
- Creating a Multicam Clip
- Checking Sync in the Angle Editor
- Syncing & Adding Angles
- Working in the Angle Switcher
- Changing the Switching Mode
- Audio Output Options
- Soloing the Best Audio Source
- Mixing Audio Components
- Performing a Multicam Edit
- Refining the Edit
- Adding a Color Preset to Angles
- Adding a New Multicam Clip

23. Live Multicam Recording

- Devices & Apps Required
- Setting up a Live Recording
- Adding Camera Angles
- Choosing a Multicam Clip Format
- Recording Apple ProRes
- Adjusting Exposure
- Monitoring Audio
- Live Recording
- How Media is Transferred
- Previewing a Multicam Clip

24. Green-Screen Compositing

- Green-Screen Lighting Tips
- Adding a Corner Mask
- Adjusting Key Parameters
- Adding a Background
- Playback Quality & Rendering
- Editing the Gradient
- Refining the Key

25. Color Correcting with Scopes & LUTS

- What is Color Correction?
- Viewing Clips Recorded in Log
- Evaluating Clips in the Waveform Scope
- Applying a Camera LUT
- Improving Contrast with a LUT Applied

26. Removing & Adding Color Casts

- Adjusting the Black Point
- Evaluating Color in the Histogram
- Removing a Color Cast
- Adding a Color Cast
- Evaluating Color in the Vectorscope
- Adding Warmth to the Highlights

27. Color Correcting with a Shape Mask

- Applying a Shape Mask
- Refining the Shape Mask
- Animating the Shape Mask

28. Working with HDR Media

- HDR vs. SDR
- Setting the Timeline Color Space
- Converting SDR Clips to HDR
- Working with Graphics in HDR

29. Editing Cinematic Clips

- Enabling Cinematic Mode
- Changing Depth of Field
- Viewing the Focus Trackers
- Deleting User-Created Focus Points
- Adding Focus Points

30. Working with Audio Components

- Expanding Audio Components
- Reconfiguring Audio Channels
- Adjusting Component Volume Levels
- Adjusting Volume without Expanding
- Converting Stereo to Dual Mono

31. Enhancing the Soundtrack

- Expanding All Clips
- Reading the Audio Meters
- Adding a Loudness Enhancement
- Copy & Paste Audio Settings
- Applying Audio Effects
- Using a Single-Band EQ
- Setting Effects Volume
- Creating Split Edits
- Adding Fades
- Creating Cross Fades
- Adjusting Music Volume

32. Managing Projects & Media

- Duplicating a Timeline
- Duplicating a Project
- Purging Project Render Files
- Exporting a Project with Media
- Exporting Clips
- Freeing up Space
- Importing a Project into FCP for Mac
